Summary

"Hello, I'm Singh Prince Rinku, a passionate B.Tech Computer Science and Engineering student at Amity University. I am excited about the world of technology and its potential to transform lives.

Throughout my academic journey, I have gained a solid foundation in computer science principles, programming languages, and software development methodologies. I am currently pursuing my degree to further enhance my knowledge and skills in this field.

Recently, I completed a web development course from Internshala, where I gained practical experience in building responsive and user-friendly websites. This hands-on training equipped me with the necessary skills in HTML, CSS, JavaScript, and frameworks like Bootstrap.

I am fascinated by the limitless possibilities of web development and its ability to create seamless online experiences. I am eager to apply my knowledge and skills to contribute to innovative web projects.

As an aspiring web developer, I am continuously expanding my skill set and staying updated with the latest trends and technologies in the industry. I am a quick learner and enjoy tackling challenges that come with creating dynamic and interactive web applications.

In addition to my technical pursuits, I am a strong believer in teamwork and effective communication. I thrive in collaborative environments where diverse perspectives come together to achieve common goals.

Outside of academics, I enjoy exploring new technologies, participating in coding competitions, and engaging in open-source projects. These experiences have further honed my problem-solving abilities and fostered a passion for continuous learning.

Education

Amity University
2022 - 2026

Amity University
Computer Software Engineering
2022 - 2026
As a skilled programmer with 2 years of experience in Web Development, I have a strong passion for creating clean, efficient, and well-documented code. My expertise in HTML or CSS allows me to develop robust and scalable solutions to complex problems.

In addition to my technical skills, I have strong communication and collaboration skills that enable me to work effectively with both technical and non-technical stakeholders. I am a proactive problem solver who is always eager to learn and apply new technologies to my work.

As a programmer, I am committed to delivering high-quality solutions that meet or exceed the expectations of my clients or users. If you're looking for a programmer who is passionate about their work and dedicated to delivering results, I would be excited to connect with you.
